Education

Pamantasan ng Lungsod ng Pasig — Pasig, PH
Bachelor of Science in Information Technology — *Expected Jun. 2027*

Experience

UnQue Cloudbook Private Limited — Mar. 2026 – Jul. 2026
Software Engineer Intern — *India, Remote*

- Delivered 40+ merged PRs across MERN and React Native/Redux applications, including features, bug fixes, and hotfixes.
- Reduced query latency by 30% by storing precomputed values instead of recalculating on reads.
- Automated resume collection and semantic screening for 300+ resumes using Python, cutting review time by 75%; conducted technical interviews for engineering interns.
- Built end-to-end tests covering critical web flows with Playwright and React Native flows with Detox.
- Collaborated in a cross-functional Agile/Scrum team and adopted Caveman and SpecKit to guide AI coding agents through feature development.

Loxon Philippines, Inc. — May 2026 – Jun. 2026
Web Developer, Contract — *Pasig, PH*

- Built and deployed a Next.js/TypeScript company website and PostgreSQL-backed admin platform for managing projects, services, clients, and job postings.
- Integrated a Groq chatbot that retrieves company content from admin APIs to answer visitor inquiries.
- Implemented Cloudinary image uploads, Resend inquiry and application notifications, and Redis-backed API rate limiting.

Self-Employed — Sep. 2023 – Mar. 2026
Freelance Software Developer — *Pasig, PH*

- Built an offline React Native/SQLite POS supporting 300+ daily transactions, sales analytics, expense tracking, and backup/restore.
- Developed an Electron/SQLite clinic system with patient records, vitals logging, and branded medical forms.
- Built a VB.NET/WinForms consultation system supporting 50–100 daily consultations, QR access, PDF reports, and bidirectional SQLite–PostgreSQL sync through a Next.js API.
- Developed a decision-tree job recommender achieving 94% accuracy on 300 unseen samples; deployed with Flask, Docker, and Railway.
- Contributed a CNN-based face recognition module averaging 20 FPS as a REST API using Flask and TensorFlow.

Projects

LEAPRS – Capstone Project | *Next.js, TypeScript, MUI, PostgreSQL, Drizzle ORM, Neon Auth*

- Developed the Lifelong Education Advancement Program Requisition System as the capstone team's developer, streamlining training requests, approvals, and budgets with configurable forms, role-based workflows, analytics, audit logs, and PDF/Excel reporting.
- Integrated Gemini for live-data assistance and document-based drafts, Google Forms API for evaluations, Groq for feedback summaries, and OAuth-secured MCP access for external AI apps.
- Implemented queued, resumable Google Drive API uploads with IndexedDB recovery, ownership transfers preserving file links, and persistent cleanup jobs with Vercel Cron retries and reference checks to protect files still in use.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, PHP, VB.NET, SQL
Frameworks & Libraries: Next.js, React, React Native, Expo, Redux, Node.js, Express.js, Flask, Electron, .NET Framework, WinForms, JavaFX, Tailwind CSS, MUI, Socket.io
Databases & ORM: PostgreSQL, MongoDB, MySQL, SQLite, Redis, Drizzle ORM
Tools & Platforms: Git, GitHub, Docker, Playwright, Detox, Postman, AWS, Azure, Vercel, Railway

Certifications & Achievements

Google Cloud Fundamentals: Core Infrastructure – Completion Badge — 2026
Cybersecurity Champion & Java Champion – CCS Academic Competition — Nov. 2025
Java Representative – ISITE National IT Skills Competition / IT Skills Olympics — 2025 / 2024
Responsive Web Design – freeCodeCamp / **Java (Basic)** – HackerRank — 2025 / 2024
Dean's Lister (4x) & President's Lister (1x) – Pamantasan ng Lungsod ng Pasig — 2023–2026
